

Chemistry Notes

Chapter 5 - Acids and Bases

Chapter 5 - Acids and Bases

1. Acids are substances that produce H^+ ions in aqueous solution.
2. Bases produce OH^- ions in aqueous solution.
3. The pH scale measures the acidity or basicity of a solution.
4. $\text{pH} = -\log[\text{H}^+]$
5. Strong acids (e.g., HCl) completely dissociate in water.
6. Weak acids (e.g., CH_3COOH) partially dissociate.
7. Neutralization: $\text{Acid} + \text{Base} \rightarrow \text{Salt} + \text{Water}$

Example: $\text{HCl} + \text{NaOH} \rightarrow \text{NaCl} + \text{H}_2\text{O}$
