

Physics Notes

Chapter 2 - Motion

Chapter 2 - Motion

1. Motion is a change in the position of an object over time.
2. Speed = Distance / Time
3. Velocity is the rate of change of displacement.
4. Acceleration is the rate of change of velocity.
5. Equations of motion:
 - (i) $v = u + at$
 - (ii) $s = ut + \frac{1}{2}at^2$
 - (iii) $v^2 = u^2 + 2as$

Example: A car starts from rest and accelerates at 2 m/s^2 for 5 seconds.
Find the final velocity and distance covered.
